ARE YOUR TEETH SENSITIVE?

Tooth Sensitivity: The Unbearable Pain.

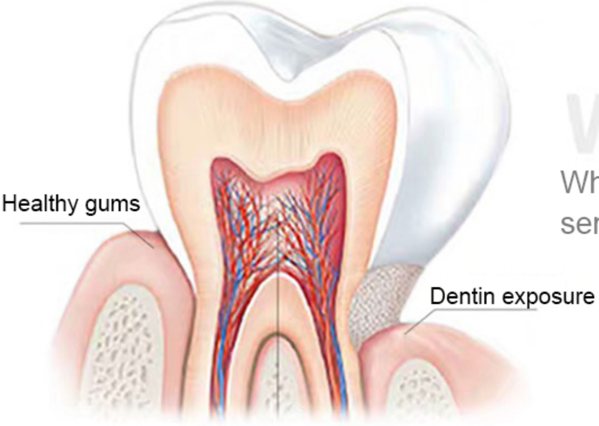
A sudden stabbing pain was so intense that I couldn't even eat.

It suddenly acts up again
at the touch of anything hot,
cold, sweet or sour.

Recurring tooth sensitivity
is just like a ticking time bomb.

SENSITIVITY ROOTED FROM GUM

As high as 80% of tooth sensitivity cases are associated with gum problems.

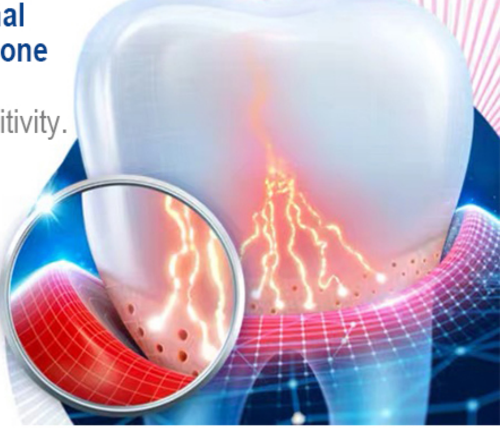


Healthy gums
Dentin exposure

WHY

Why does tooth
sensitivity occur?

The exposure of dentinal tubules makes them prone to stimulation,
which causes tooth sensitivity.

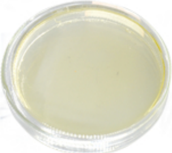


EPIDEMIC PREVENTION STARTS FROM ORAL CAVITY

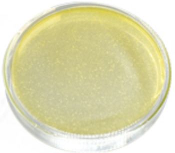
Epidemic prevention and control starts with oral health.

1、Nano herbal plant essential oil

Nanoparticles have fast penetration and wide distribution, which instantly kill oral bacteria and viruses, preventing diseases from entering through the mouth.



The effect of nano toothpaste forprotecting teeth on inhibiting salivary bacteria after 48 hours



The effect of salivary bacteria after 48 hours

2、 Nano CoQ10

Coenzyme Q10 is a highly effective antioxidant that can enhance the oral cavity's self-immune function, effectively resist the invasion of bacteria and viruses, and protect overall health.

Gum pain
Bleeding gums
Periodontitis

Relieve oral problems

Canker sore

Bad breath

Tooth sensitivity

Deeply purify harmful substances in the gingival sulcus

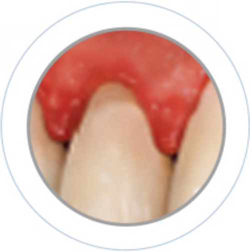
Why do gum problems keep recurring?

At the junction of gums and teeth lies the gingival sulcus, which harbors many harmful substances. When the gums are irritated, symptoms like frequent bleeding and redness often occur.

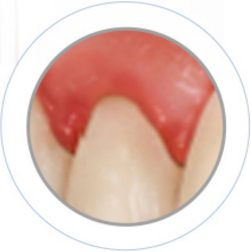
Effectively clean harmful substances in the gingival sulcus.

Reduce gum redness and bleeding

Continuous use promotes gum health and strengthens the gums



Gums with severe redness and swelling



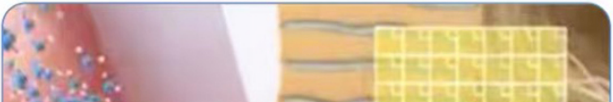
Gums with significant reduction in redness and swelling

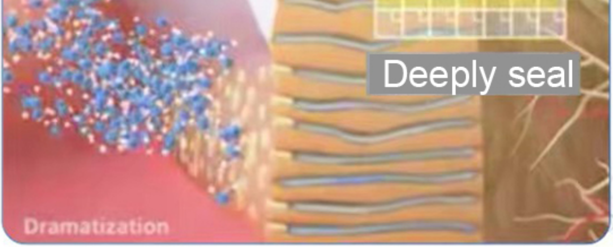
Healthy and strong gums

DEEPLY BLOCK EXPOSED DENTIN TO SOLVE SENSITIVITY

Deeply seal, fear no sensitivity

Specially contains Nano Coenzyme Q10 for deep repair of exposed dentinal tubules





Deeply seal
Dramatization

Deeply seal exposed dentinal tubules, form a dense protective layer, and say NO to sensitivity!

Seal more deeply and solidly

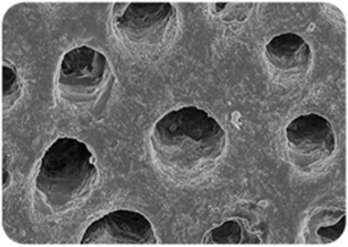
Regular toothpaste

Ordinary toothpaste only provides surface sealing, with hollow inner layers

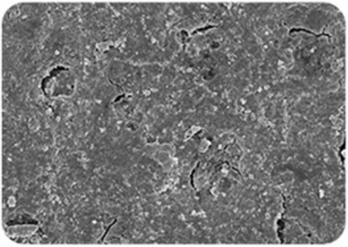
NANO TOOTHPASTE FORPROTECTING TEETH

Deeply and solidly seal exposed dentinal tubules

Effective sealing for greater peace of mind



Before use: Exposed dentinal tubules, prone to sensitivity



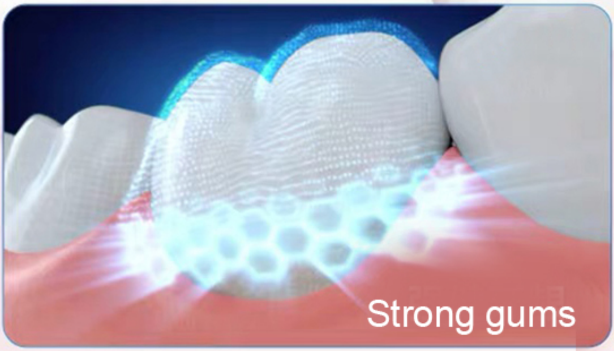
After use: Most exposed dentinal tubules are sealed

Bad breath disease, also known as bad breath or oral odor

Reasons for bad breath:
1. It is because food residues ferment in the mouth, forming decay.
2. Inflammation in the oral cavity, such as periodontitis, gingivitis, etc.

Strengthen gum to solve sensitivity from root cause

Repair at the source,
strengthen the gums,
and fear no sensitivity
with continuous use



Strong gums

When you wake up the next day, your mouth still feels like you just brushed your teeth
